NBBinder test on a collection of notebooks about some thermodynamic properties of water

[Water Contents](#) | [References](#) | [Introduction ->](#)

1 Water Contents

The purpose of these notes are solely to illustrate the use of the `nbbinder` library with notebooks that include not only pure-text markdown cells, but also pictures and code cells.

They would normally fit into a single Jupyter notebook, but that would miss the point of the library, which is to bind several notebooks. Thus, the presentation is split into a number of them.

1.1 Table of Contents

1.1.1 [Water Contents](#)

1.1.2 [1. Introduction](#)

1.1.3 [2. Reading the Data](#)

1.1.4 [3. Low-Dimensional Fittings](#)

1.1.5 [4. High-Dimensional Fittings](#)

1.1.6 [5. Choosing the Best Fit with AIK](#)

1.1.7 [References](#)
